

# Preservation plans

This is the second in a series of 'Service Information' instructions for the 'Wax preservation of passenger car bodies', issued by the (then) Daimler-Benz factory in the 1970s, which we are reproducing from the Club's archives. Supporting instructions and contact details for suppliers were given in the August Gazette.

In future issues this series will cover W108/9 saloons, W114/5 coupés and saloons, R107 SLs and SLCs, W116 saloons and W123 saloons, coupés and estates.

**Preservation plan**  
**230SL-280SL (W113)**

- a First preservation on older vehicles
- b Repeat preservation
- c Repair preservation
